Applications Platform

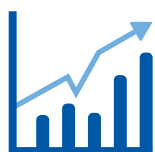

IntraSight

Technology
Maximizer Plus

Stay clinically advanced. Keep maximizing performance.

Boost the clinical capability and operational performance of your Philips Interventional Applications Platform— IntraSight— with Philips Technology Maximizer Plus.

Benefits of safeguarding your investment

Maximize capital savings through structured upgrades

Save up to 50% for upgrades with predictable budget*

Keep your imaging systems secure and stay protected from obsolescence

How Technology Maximizer Plus works

Technology Maximizer Plus is a software upgrade and hardware refresh program that enables optimal performance on your IntraSight.

You receive the latest available software and hardware technology releases for a fraction of the cost of purchasing them individually. No need to wait for budget approval. No need to buy individual upgrades. No hassle. Just a cost-effective way to manage ongoing technology upgrades through your operational budget.

*The cost for three upgrades will be at least \$55,000, but with Technology Maximizer customers can expect to save 50%.

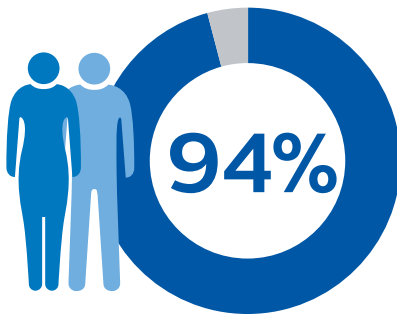

Peace of mind through structured upgrades

When you participate in the Philips Technology Maximizer Plus for your IntraSight Platform, innovations will be provided as upgrades for your system, and will be delivered upon release. These upgrades include:

Benefits	RightFit Maintenance Contract	Technology Maximizer Plus
Mandatory safety fixes and cyber security patches	✓	✓
Software update to fix bugs	✓	✓
Operating system upgrade (Windows OS)	✗	✓
New hardware to support new technologies ¹	✗	✓
All other software upgrades	✗	✓
including upgrade of purchased clinical packages, new basic functionality	✗	✓
Advanced training for new clinical features and/or applications	✗	✓

¹ Hardware upgrades under Technology Maximizer Plus support new technologies, e.g. new PIMs, monitor, etc.

Convenient and efficient way to keep pace with clinical innovation

of customers indicate the importance of technology upgrades (software and hardware) to enhance the performance and value of their imaging system.¹
