

PHILIPS

Digital radiography
and fluoroscopy

Enhanced trade-in
program

Trade in. Trade up.

Philips enhanced trade-in program is very rewarding

For a limited time, trade in current systems at attractive financial terms. A bonus will be applied to the standard trade-in value of your existing system when you purchase a new Philips system with enhanced clinical and workflow advantages.

“Patients need to have confidence when they come to our hospital that they are going to get the right scan in the right way. For quality of care we have to have equipment that’s reliable. Philips has been able to help us right-size each solution.”

Paula Gonyea, Network Regional Director
Radiology, University of Vermont Medical Center

94% of the users

think that the live camera images at the work station helps to avoid retakes.²

Utilizing the DigitalDiagnost C90 allows you to see

15 more patients per day.¹

DigitalDiagnost C90 allows you to

avoid around

28
retakes
per week.¹

¹ Compared to the previous release of DigitalDiagnost and based on 100 patients per day. Actual results in other cases may vary.

² Validated by clinicians in a Philips' development environment.

X-ray is more than an image

It's often the start of a patient's care journey and it supports critical clinical decisions from prevention through treatment across the care continuum. Right now is the ideal time to trade up to a system that furthers your initiatives to enhance productivity, workflow, the patient experience and care team satisfaction.

Why settle for this?

Aging equipment

State-of-the-art equipment from a comprehensive portfolio to meet needs now and in the future

Dose concerns

Advances in dose management

Less than optimal workflow experience for clinicians and technologists

Improved clinical and workflow experience

Trade in any radiography or fluoroscopy system toward a new Philips system

Supporting you at every turn

- Industry-first tube and detector for life* guarantee
- Complete education and services packages to help you get the most from your investment

Replace your current system with Philips DXR innovations in image quality, dose management and workflow

“ The image quality on the ProxiDiagnost has been phenomenal. Using the Dynamic Unique to be able to visualize body structures of different densities with a large field of view has been game changing. The ability to use low dose imaging for acquiring everyday examinations has not only been good for the patients but also the radiologists and technologists that are working in fluoroscopy every day.”

Karson Morgan, Director of Radiology, Central Valley Medical Center, UT
